

# Speedy ID Using Design Thinking

Step 1

## Define & Listen

Define the problem to be solved  
Listen empathetically to the learners

Step 2

## Ideate, Prototype & Test

Pick your best idea and create a lo-res prototype  
Test your prototype on your audience

Step 3

## Revise & Replace

Consider replacing the approach entirely  
Make the changes and test again

Step 4

## Continue Iterating

Continue iterating as you zero in on success  
Let your learners guide you to the right content

Step 5

## Finalize & Implement Permanently

Make it pretty  
Publish and Implement
